

MSCCH-02
ORGANIC CHEMISTRY

Name of Unit	Page no
Unit-1: Delocalized Chemical Bonding	1-19
Unit-2 : Five And Six Membered Heterocycles Containing One Heteo Atom	20- 50
Unit – 3 : Aromaticity	51- 66
Unit - 4 Complex Organic Molecules	67-103
Unit - 6 : Stereochemical Principles	104-118
Unit 7 Optical activity in the absence of chiral carbon	119-141
Unit-8: Aliphatic Nucleophilic Substitution	142-159
Unit-9: The SN^i mechanism	160-172
Unit-10 : Addition to Carbon-Carbon Multiple Bonds	173- 213
Unit-13: Elimination Reactions	214-229
Unit - 14 Oxidation And Reduction	230-250
Unit-15 : Reactive Intermediates	251-272
Unit-16 : Molecular Rearrangements	273-293
Unit -17 : Phosphorus Nitrogen and Sulphur Ylides and Stereochemistry of compounds containig Phosphorus Sulphur and Nitrogen	294-315
Unit–18: Addition to Carbon Hetero Multiple bonds, addition of Grignard Reagent, Organozinc, organocopper and organolithium reagent to carbonyl and unsaturated carbonyl compounds	316-334
Unit-19 : Conformational analysis of Acyclic Molecules	335- 357
Unit–20: Introduction to electromagnetic radiation	358-395
Unit - 21 Vibrational Spectroscopy	396- 413
Unit - 22 Nuclear Magnetic Resonance	414-439
Unit - 23 : Mass Spectrometry	440-460
Unit - 24 : Organic photochemistry	461-481
